Weekly report

Week 5

What we plan to do:
This week we plan to fix our project and documents for the hand-in this friday. We plan to fix our RAD and create and fix our SDD as well as create JavaDoc for our code. All documentation is also planned to be written in english. We are happy with the current state of our application at this point in time and do not plan to rush anything for the hand-in.

What we did:
We fixed our RAD and translated it from swedish to english. We also created JavaDoc for our code and continued at normal pace with our application. We also created our SDD and decided to write it in LaTeX.
